NEWS FROM THE MINES.

ITEMS OF INTEREST FROM LEADVILLE AND
OTHER CAMPS.

**Ore Developments From the Foster Lease—
Work Progressing on the Weir—Strike in
a New Claim—The May Queen Flooded—
The Horse Shoe District—Local Mining
Notes.**

The outlook for Rock Hill is very fair for this time of the season. The prospect of getting out some good ore, though it is understood not in sufficient quantities to fill contracts. Right on the line of Park and Lake Counties, on the right hand of the trail leading from the mouth of Curren, a claim has been located called the Count Line. In this is a big strike of lead ore has been made. The outcrop is now nearly seven feet in thickness, but has but little development work done upon it, so it is impossible to say whether the connection is continuous.

lead to the front so rapidly that it proves to be less than was expected. The workmen are now mined in the camp. Just over the range the Last Chance has resumed work, and the prospect is very bright.

WORK ON THE SILVER BELLE. The Silver Belle Co. of St. Louis and Kansas City, principal owners of the mine, are fast with their shafts. It is now down about 40 feet on the west side of the mine, and the work will be much more rapid ere long, as the management here are negotiating for the purchase of the rights of the Silver Belle, and intend to sink its shaft at least 100 feet. The Silver Belle is a very rich mine of silicified limestone, and in a section that is very rapidly coming to the front, some very fine lead ore has been discovered. It is in its immediate vicinity.

The indications at present showing in the Silver Belle are very good, and it is a belief that are long they will be a good body of ore. The Silver Belle is a very rich mine, and in the direction of the Venus and Hermes, and the ore chute upon which these

Will doubtless be caught in the K. A. M. Near the above mine is the Devil, in which a few tons of ore are being shipped out a few weeks also as coming from the near approach of the Mikado ore, and the Mikado ore. Here also they are drifting, with a view of watching the Mikado ore chute, or the Venus mine.

The Matchless mine is doing about the same and shipping some sixty tons of ore per day. The property is being worked by the Mikado ore, this property, which, after passing through the Mikado ore, is being shipped out a few weeks into a thick black mass, the nature of which has not as yet been determined. The Mikado ore is being shipped out a few weeks of the stuff met with in the core of the diamond drill proves to contain ore a shaft will be sunk at this point.

WATER IN THE MATHEN.

And the water upon which the losses on the HAYDEN shaft of the Mikado ore ground are at work having been found to be so bad, and the Mikado ore ground, and any further exploitation of that property having been preceded by the Mikado ore, the Mikado ore, the Mikado ore has been surrendered. This is not well, though it is possible that the company may go on to the Mikado ore, the Mikado ore, the Mikado ore known to exist in the bottom. Heavier mass

[illegible]

For this purpose, but it is very probable that he now forms ore chutes of the Henriett and the Pleasant and the Pleasant.

In the new Roberts shaft of the Evening star some very fine lead carbonate has been discovered. The ore is very rich and the quality is holding out finely. This carries an excellent management of the ore. The purpose is to manage the steel, contracts for which have been made.

The Pleasant and Crescent are also filling large contracts with steel works both at Pueblo and in Chicago, and are shipping large quantities of steel to the West. At this some fine silver-iron ore is being mined and shipped, particularly from the Crescent.

The Horseshoe district is attracting a considerable amount of attention. A great deal of new work is going forward in that section, while the older properties, the Peoples and the Crescent, are also being worked. The latter has more. The mill of the Chance mine is running full time on the ore from the Hill and the Crescent.

The Henriett and the Maid affairs are also being worked. The shaft is going down the workings from the upper levels continue and the shaft is now at a depth of about 55 feet.

below the 700-foot level and station timbers are being placed. The level of the shaft has now reached a depth of 70 feet below that level a pump will be left of about 10 feet and drifting again, the levels being about 60 feet apart. It is expected that the shaft will be 100 ft. within the Adams shaft. This is not so, nor was it expected to be. The chute can only be met with in the Adams shaft. It is not drifting. This again illustrates the necessity of sloping close to the shaft, which makes it stronger than if such were the case.

THE ADAMS SHAFT.

The old discovery shaft of the Adams is now timbered down to a point about one hundred feet below the level of the Adams shaft and machinery are now being placed in position to continue the work. Everything is now ready for the first trial. The shaft will soon be down to the water.

[illegible][illegible]

The El Paso Coal and Lumber Co. has been awarded a contract for 100 feet on shaft A of the Wolfstone mine, near Big Horn, and have commenced work to carry the shaft down, expecting to connect with the Juniata vein at about 100 feet. On the 15th inst. the shaft was down 100 feet. The shaft has been put in, and, stopping on the vein below, the ore here occurs in kidneys in the conglomerate. The shaft is being run by an elevator. The El Paso Coal and Lumber Co. will soon be merged into a new company called the Sulphide Mining Co., and has secured a long lease on the El Paso mine, near Big Horn, and is now working on the conglomerate ground, where practically the entire synclinal basin at that point is composed of conglomerate. The conglomerate is being extracted, and the ore which is opening up in great shaft all through their property.

The Local Market.

The number of stocks dealt in was small and the sales trifling in amount, with the ex-

The demand for the stock of the American and Nettie was unusually strong and the sales were considerably above the average. The market opened at \$1,924, bid, but sales were made until bidding had advanced to \$1,974. At that figure it became evident that there were a number of selling interests. About 100,000 shares of the thirteen hundred shares were transferred, but sellers were still to be found, and trading closed at \$1,974. The balance of the stock was received from the mine, stating that ore had been raised and shipped, and that a check for fifty \$30,000 would be forwarded to St. Louis in a few days. When the stock was sold, the balance of the treasury and a dividend will be declared. The mine is said to be in excellent condition and the stock is well held.

There was slight advance in Central Silver. The stock selling at 15, which was paid for 600 shares.

Mickey Breen was \$1.30 bid, \$1.35 asked. In the curb J. J. Mullally offered to buy puts on the stock at \$1.35, paying 50 cents a share, but the offer was not accepted.

La Union opened at 9 1/2, but after 100 shares had been sold dropped to 9, at which figure 100 shares were disposed of.

There were no sales on the curb. Elizabeth at \$2.15 asked, 200 shares. B. B. B. was 2 bid, 200 shares.

Neptune was offered at 50.

St. Joe declined sharply, being offered in large lots at 15, with no takers.

The market was dull and few orders were made in.

A letter was received from the Superintendent of the Little Abita, endorsing a check for \$74.19, the net return from a car load of ore recently shipped. A telegram has been received from the same company, advising the shipment of another carload of ore.

At the election for Directors of the George L. Mining, Milling & Smelting Co., the following officers were elected:

- President, A. T. Perry,
- Vice-President, C. E. Hunter,
- Clerk, Ad A. Hunnaker,
- Secretary, Wm. Cory.

The Superintendent writes that in looking over the Anna shaft they have struck a vein of lead ore, which will pay well. It may for gold could be made at the time. The ores were sent for to Lake City and the ore

from the George III, has reached the approaches of the Anna Maria, as the quarters of the latter are in connection with the raft at a depth of 100 feet where the ore is reported to assay very high.

Reports from the Nellis continue to be very favorable, and on July 6, last, Capt. Erman reports that on the preceding day he had begun to pump the water out of the mine. On the following day he was able to get rid of the water out of the mine and was getting ready to work on the level below. He also reported that the engine and setting the boilers and machinery at the mill; and that on the 13th inst. he was beginning his readiness to start the mill the following day, at dropping twenty steps, intending, if successful, to drop another thirty steps. The mill full capacity of forty cars, having been made and a good supply of ore.

AN INDIGNANT DOMINIE.

The Honorable Mr. Justice
Inaugurates a Religious and Legal War
on Account of a Libelous Dispatch.

TELEGRAPH TO THE POST-DISPATCH.

MONTREAL, Ill., July 19.—There is a lively

and legal war going on at Hillsopolis. Elder R. E. Howell, pastor of the Christian church at Hillsopolis, reads the following letter, whereupon R. L. Spencer, editor of the Hillsopolis paper, reads a special dispatch to the papers saying that Elder Howell had not been in satisfaction to the church and that he sent himself from the prayer-meetings to buy a croquet.

The Elder and his brethren are very wrath, they have issued a manifesto which declares that R. L. Spencer has been guilty of forgery and under and that the special was false. The manifesto is signed by thirteen members of the church and the family where it was alleged he had bought croquet. Elder Howell is a son of the

are in Central Illinois. He will present a paper published Spencer's diatribe about him and his alleged wrongdoings. Spencer also claims he has been slandered by officers and members of the Christian band and will prosecute them in court.

A New Principal.
TELEGRAPH, THE POST-DISPATCH,
GLOUCESTER, N. H., July 12.—Prof. N. C.
Mendenhall of Natick, Mass., has been chosen
principal of the Boston Technical public schools,
a place of the Hon. T. M. Keoghinsky, resigned.

Money That Ought to Be Paid Into the State Treasury—A Hot Game of Freeze-Out—More of Secretary Pearson's Economy—The Cost of Charity—New Corporations—Illinois Items.

[illegible]

aged wholly in making for himself a world, and he cannot say to Willis, "Mr. Smith, I have been here a long time and I must go," but he can say to Willis, "I am not some other good man," but he took Willis of his comfortable position and has graduated into a position of a man who has no status until now, in this intense heat, he has been made to feel like a creature laws mow on the State-house lawn, a way that would kill any ordinary man, but he says it is the hottest game of "freec" he ever got into.

HEMPT OF FRABSON'S ECONOMY.

Always a man of the "free" type, Harry Hempt, one of the schemes to give employment would secure the foreign vote to the Republican party, and he has been in the hands of cinders, which were moved in the winter and to the rear of the building in summer. These cinders are now entirely covered by a layer of dust and blown away. The last was carried back on Tuesday last in a coal scuttle and now the man is back in the "free" scheme. Frabson has been having some success in the State and has been giving the work to home people, but he has been criticized some for not providing. He has been criticized some for giving the work to home people, but

there is much regret among the miners for the resignation of William Seale, President of the Twelfth District Miners' Union of America. The Republicans of the Twelfth Senatorial District have nominated Mr. Seale for the office of Representative in the House of the next General Assembly of 1905. Mr. Seale's qualifications are such that he has been considered by the former party as being well fitted for the position. He would be in the role of a lawyer.

THE PIAMA ASSEMBLY.
Extensive arrangements are being made for excursions on the Hiaw Line to the Piama assembly, which will hold a three-weeks' convention at Big Lake, Minn., commencing Monday, July 31. The services of several
